

*Your Success Is Guaranteed!*

*Success Guarantee &  
elective Single Embryo Transfer  
Success Guarantee Plans*

SDFC values your well-being and the health of your pregnancy; transferring one embryo effectively eliminates the risk of a twin pregnancy and reduces complications.

Standing behind our exceptional clinical expertise and pregnancy success statistics, SDFC offers a risk-sharing program called "Success Guarantee." If you do not achieve a live birth

after completing your Success Guarantee cycle, you will be reimbursed up to 100% of the SDFC cycle fees.

This program offers peace-of-mind and the achievement of your goal – or you will receive a refund of your cycle charges.

SDFC offers this exciting

alternative to traditional

financing by providing you with the opportunity to experience our unmatched financial support coupled with our commitment to shared success in achieving your dream: a baby for you!

*Follow Your Dreams...*

*San Diego Fertility Center*

SDFC is a global leader in Assisted Reproductive Technology. We are recognized as one of the top facilities for egg donation and surrogacy and have assisted thousands of couples, around the world, in achieving their goal of having a baby.

Our physicians and staff provide individualized, compassionate care while offering comprehensive fertility treatments and services. Our excellence has brought success and hope to people all over the world unable to conceive due to infertility.

## Our Unique Approach

### Egg Donor IVF Program

*San Diego Fertility Center* consistently maintains some of the highest live birth rates for Egg Donor IVF worldwide! *SDFC* experiences clinical pregnancy rates of 70%-80%. The latest data from the Society of Assisted Reproductive Technology reports that *SDFC* outpaces the majority of U.S. fertility clinics by an average of 25%-30% every year. Additionally, *SDFC* partners with national and international surrogate agencies; assisting Intended Parents to successfully build their families with the help of gestational carriers.

Unlike other egg donor agencies, *San Diego Fertility Center's* in-house Egg Donor Program is supervised by nationally recognized fertility specialists. Egg Donor IVF recipients have the option of selecting an in-house candidate or utilizing an agency egg donor. All egg donors undergo medical, genetic and psychological screening. The opportunity for "known donation" and "future contact" is also possible.

## Traveling to San Diego Fertility Center

With three clinics conveniently located in Southern California, *SDFC* offices are easily accessible by private or public transportation from several international airports. Considered a desirable tourist destination, San Diego offers a wide selection of housing, entertainment and activities.

### Leading Experts, Compassionate Care

*San Diego Fertility Center* is one of the most respected and experienced fertility clinics in the world, and boasts a patient population that is local, national and international.

With over 70 years of clinical and research, the fertility specialists at *SDFC* offer hope and are committed to providing patients with the most advanced fertility treatments available.

## Pre-Implantation Genetic Screening & Diagnosis

Preimplantation Genetic Screening (PGS) is a technique that may be used in conjunction with IVF to identify chromosomally normal embryos; transferring the best embryos significantly improves the opportunity for a healthy pregnancy. PGS screening provides information on the genetic composition of each embryo including the sex of individual embryo. *SDFC* counsels our patients to better understand this technology and determine best options for family building. Additionally, Pre-implantation Genetic Diagnosis (PGD) is another tool available to screen embryos thereby reducing the risk of having a child affected inherited genetic disorders.

“ The combination of *SDFC's* exceptional success rates and the success guarantee refund program, gave me peace of mind during my treatment. I felt 100% confident that I made the right choice to travel to *SDFC* for care. ”
